## Professional Summary

---

MERN Stack Developer with hands-on experience in building scalable web applications using React.js, Next.js, Node.js, Express.js, and MongoDB.

## Education

---

|                                                                                       |           |
|---------------------------------------------------------------------------------------|-----------|
| <b>B.E. (Information Technology)</b> , Savitribai Phule Pune University<br>CGPA: 8.41 | 2021–2025 |
| <b>HSC, B.L. Indo Anglian Public School, Aurangabad, Bihar</b><br>Percentage: 66.6    | 2019–2020 |
| <b>SSC, Sun Beam Public School, Rohtas, Bihar</b><br>Percentage: 60.50                | 2018–2019 |

## Technical Skills

---

- **Programming Languages:** Java, JavaScript (ES6+), TypeScript
- **Frontend / Frameworks:** React.js, Next.js, HTML5, CSS3, Bootstrap, Responsive Design
- **React Concepts:** React Hooks, React Router
- **State Management:** Context API, Redux (Basics)
- **Backend:** Node.js, Express.js, RESTful APIs
- **Authentication & Security:** JWT, Sessions, Cookies, Role-Based Access
- **Databases:** MongoDB, MySQL, SQL
- **DevOps & Deployment:** CI/CD (Basic), Vercel
- **Tools & Platforms:** Git, GitHub, Postman, Jira

## Experience

---

|                                                                                                                                                                                                                                                                                                                                                                                                                                    |                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Full Stack Developer Intern, Syllogos Systems</b>                                                                                                                                                                                                                                                                                                                                                                               | July 2025 – Present  |
| <ul style="list-style-type: none"><li>• Architected a scalable online course platform using Next.js, Node.js, Express.js, and MongoDB.</li><li>• Designed RESTful APIs handling <b>500+ daily requests</b>.</li><li>• Optimized server-side rendering and database queries, improving page load performance by <b>30%</b>.</li><li>• Coordinated with a <b>5-member Agile team</b> to deliver production-ready features.</li></ul> |                      |
| <b>Software Developer Intern, Voicetician Technology Pvt. Ltd.</b>                                                                                                                                                                                                                                                                                                                                                                 | Feb 2024 – July 2024 |
| <ul style="list-style-type: none"><li>• Developed <b>20+ reusable React components</b> from Figma designs, improving UI consistency across modules.</li><li>• Integrated REST APIs using Axios and managed frontend state for dynamic data rendering.</li><li>• Reduced UI-related bugs by <b>25%</b> through functional testing and cross-browser compatibility checks.</li></ul>                                                 |                      |

## Projects

---

### Virtual Campus Connect ([Live Project](#))

- Engineered a full-stack **MERN application** enabling **200+ students** to communicate via real-time direct and group chats.
- Implemented secure authentication and role-based access using JWT.
- Designed MongoDB schemas and created full **CRUD operations** for marketplace listings and study resources.
- Deployed the application on **Vercel** with environment-based configuration.

### Weather App

- Created a responsive weather dashboard using **JavaScript** and the OpenWeatherMap API.
- Implemented error handling and reduced unnecessary API calls, improving response time by **20%**.
- Designed mobile-first UI using **Flexbox and CSS Grid** for consistent user experience.
